

Palmetto® St. Augustine

Palmetto® St. Augustine is the most sold patented turfgrass in the world with more than 2 billion sq. ft. sold. Palmetto can be found from coast to coast across the southern two-thirds of the United States as its versatility allows for it to grow under a number of different conditions and climates. Often selected as a superior turfgrass to other St. Augustine brands, Palmetto is selected for its better color, finer texture and superior shade, cold, frost, heat and drought tolerance due to the extensive root system it creates underneath the soil surface.

Palmetto St. Augustine **Characteristics**

Shade Tolerant

Wear Tolerant

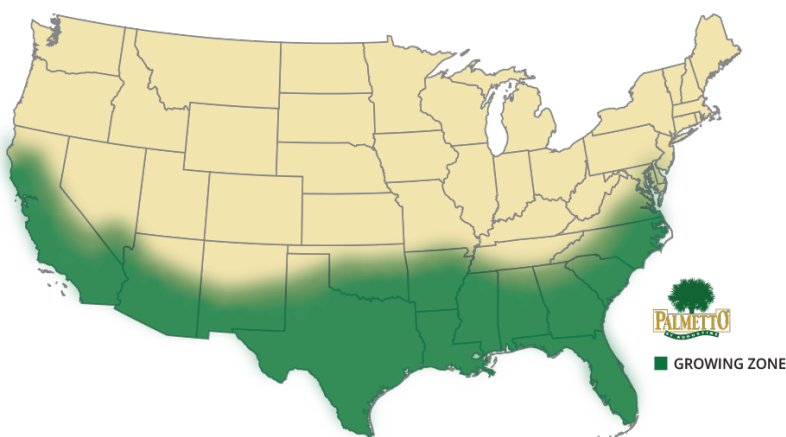

Soft Texture

Cold Tolerant

Where it **Grows**

Lethal Viral Necrosis **Resistant**

Palmetto has been designated by the University of Florida as LVN resistant, which is why it's very important to ensure you get Genuine Palmetto® St. Augustine. Palmetto has been a staple in southern lawns for decades and can only be purchased from Sod Solutions Licensed Producers and Authorized Distributors or directly from Sod Solutions.
