

# FIVE STAR™ Potassium 0-0-25

## GUARANTEED ANALYSIS:

Soluble Potash (K<sub>2</sub>O).....25.00%

Sulfur (S).....17.00%

17.00% Combined Sulfur (S)

Derived From: Potassium Thiosulfate

**SPECIFICATIONS:** 12.2 lbs. at 110 degrees F pH: 7-9

### KEEP OUT OF REACH OF CHILDREN

**PRECAUTIONARY STATEMENTS:** Wash thoroughly after handling. Wear rubber or chemical-resistant gloves. Wear eye protection.

FIRST AID AFTER SKIN INHALATION: Remove person to fresh air and keep comfortable for breathing. FIRST AID AFTER SKIN CONTACT: Wash skin with plenty of water. FIRST AID AFTER EYE CONTACT: Rinse eyes with water as a precaution. FIRST AID AFTER INGESTION: Call a poison center or a doctor if you feel unwell.

**FOR CHEMICAL SPILLS, LEAKS, FIRE OR EXPOSURE:** Call CHEMTREC: (800) 424-9300.

**HANDLING AND STORAGE:** Store in a safe manner. Keep tightly sealed and store in original containers. Dispose of unused product and empty containers in accordance with federal and state regulations.

Refer to the following table when varying the rates of potash and sulfur when using Five Star Potassium 0-0-25

| Application Rates for 0-0-25 Potassium |                                    |                          |
|----------------------------------------|------------------------------------|--------------------------|
| Fl. Oz./1,000 sq. ft.                  | K <sub>2</sub> O per 1,000 sq. ft. | Sulfur per 1,000 sq. ft. |
| 11                                     | 0.26                               | 0.18                     |

## Direction for Use Potassium 0-0-25

| Application                                                                                                                                                                                                                                                                                                                     | Rate                                                                                                                                                                                                                                               | Considerations                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Lawn Care                                                                                                                                                                                                                                                                                                                       | 1 1/2 gal - 4 gal spray solution per 1,000 sq ft                                                                                                                                                                                                   | Initiate application in Spring when first green-up appears, repeat as necessary through growing season. Apply as a dilute solution with hand gun, spray boom or injected through irrigation system. Recommended to tank mix with BWI's 28-0-0 N for increased efficiency and safety. Use adequate water and coverage, esp. during low humidity and high temps                                                                                                                                                                        |
| Cool, Transitional, Warm Season Turf Grasses                                                                                                                                                                                                                                                                                    | 1/4 - 1 lb K (11-43 oz) per 1,000 sq. ft.<br>4-6 applications at 8-12 wk intervals = 1-6 lbs. K per 1,000 sq. ft per irrigation year at 11-22 fl oz                                                                                                | Rates will vary according to irrigation schedule. Use lower rates with more frequent waterings                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Fairways                                                                                                                                                                                                                                                                                                                        | 1-2 gal (0-0-25) (3-6 lbs potash) per 1,000 sq. ft growing season                                                                                                                                                                                  | Use as sole K + Sulfur source or combine with N and P sources for desired fertilizer blend for fairway nutrition. Split application to coincide with nutritional demands of cultivars present and Superintendent's turfgrass nutrition program                                                                                                                                                                                                                                                                                       |
| Tee's and Greens                                                                                                                                                                                                                                                                                                                | Spoon Feeding: 1/4 lb. K (11 oz 0-0-25) 2-4 gal spray solution per 1,000 sq ft every 14 days<br>Fertigation: May be injected during ea. irrigation.<br>Recommended Rates to be in accordance with soil test data and equipment manufacturer's rec. | Application may be made in conjunction with the turf protection chemical program. In the absence of published data a "jar test" is recommended to ensure compatibility. Irrigation is recommended following application                                                                                                                                                                                                                                                                                                              |
| Ornamental Trees and Shrubs                                                                                                                                                                                                                                                                                                     | Deep Root: 1-3 lbs per 1,000 sq. ft Foliar<br>Sprays: 1 gal per 100 gal spray solution                                                                                                                                                             | Can be made in Spring or Fall. Spring: apply after frost is off ground but before leaf out. Fall when most leaves have dropped or less than 50degree soil temp. Inject 8-12" deep on grid pattern 2-3 ft apart to cover drip line plus 1/3 beyond dripline. If mixing with N and P, 1:2:3 to 3:1:1 ratio recommended. Consult Certified Arborist for recommendations based on soil test.<br><br>Can be used in conjunction with turf protection chemical program. Do a simple "jar test" to determine compatability prior to mixing. |
| <ul style="list-style-type: none"><li>Do not apply 0-0-25 to foliage of plants sensitive to sulfur to avoid foliar burn</li><li>Do not apply to foliage of any plant when temps are above 90 degrees F</li><li>When mixing with pesticides, always maintain vigorous agitation during filling and spraying operations</li></ul> |                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
